The Anti-Nebraska Meeting at Hartford—Position of the Hartford Times, &c.

The anti-Nebraska meeting called by petition of cartain citizens of Hartford, came off last evening at the City Hall.

our democratic Senator in Congress, that if he woted the Nebraska bill, he will never dare meet his constituents again.

Judge Eilsworth followed. But I will not enlarge. I will, however, give you a touch of the apseches of Mr. Joseph R. Hawley and the Hen. John M. Niles, the leading abolitionists, who spoke last. Mr. Niles went back to the creation of the world. He compared Douglas to Satan at the time he took our Baviour upon a mountain, where he offered him all the nations of the earth if he would fall down and worehip him. But our Saviour said, "Get thee behind me Satan." Mr. N. likened it unto the South, which refused to steal the territory offered, but are whiting to take it as stolen goods, Douglas being the cate-paw. Ex-Senator Niles went on in this strain for an hour. He said he had been somewhat of a traveller himself. When in England he was careful to be a freesoiler. He had been enabled heretofore to plead some excuse for American slavery, for it was originally introduced here by the English. Should Douglas's bill pass, making alave turritory where none existed before, that plea could no-longer be made. In the history of the whole world slavery never had been instilled by legislation, and if Douglas's bill passes he will have the credit of producing this new feature in alavery.

He finally closed his speech by finatering Hartford, in representing the tramendom semantion she will create in Washington. He then moved that the proceedings of this meeting be forwarded to our delegation in Congress and to the President of the United States.

The meeting then closed with a unanimous vote

PROPOSITION TO UNITE THE HARDS AND SOFTS IN HENSELABS GOUST. The Pres Bull Democratic Outral Committee of Troy, it a mostless hold or the 54th inst., adopted the follow-

to three heretofore comprising the united democratio party.
Resolved, That a copy of the above resolved transmitted to the City Destral Committee of than Bronzon, Eq. is chairman, that he be yelly it before ead said committee for their a the request that an early answer be returned.

majority in favor	of the e	soals, 125 923. Oc	e county,

Majority in favor of the essais, 125 922. One county, (Ciloton, ) to hear from. The total vote will sum up about 246,000.

It will be seen that the following sensities gave majorities against the proposed amendment to the constitution:—Delaware, Franklin, Greene, Grange, Otage, Pat nam, Queens, Schoharie, Steuben, St. Lawrense, and Tiogs

FINANCIAL AND COMMERCIAL.

MONEY MARKET.

MONRY MARKETT.

Monnar, Feb. 27.—6 P. M.

The stock market opened heavy this morning, both as legarde prices and transactions. It was literally blue Monday, and the bulls appeared to be indifferent about operating. The bears made strong efforts to depress the masket, but failed in so doing. None of the faucies were in demand. Rrie Railroad, Readiling Railroad and Harlem Railroad ness more netive than others, and were well custained. At the first board to day, Orystal Palace advanced 8 per cent; Reading Railroad, ½; Hudsee Railroad, ½; Geveland, Columbus and Cinciunati Railroad, ¾. New York Contral Reading Railroad, ½; Geld Hill Shock was steady at inturday's prices. The improvement in Orystal Palace has been caused, doubtiens, by the probability of a change in the management. It is in contemplation to make a complete change in the Ecand of Directors. This may put up the steak a little, but it is too late to mye the concern from bankrupley. First clear railroad boads and railroad stocks are not pressing on the market for sails, and prices are therefore firm. Bank stocks and the lower class of fancies, are not operated in much at the board. We have estima known the Stock Erchange to be so free from worthless facey stocks as at peacest. There are not half a doom on the list which have very little or no value. In fermer periods of apopulation, many of these

which are now substantial dividend paying occurities were fundes of a very low character, and fluctuated largely during any excitement. Nearly all those which had no value have disappeared, and the market is now less burdened with such trash than before. We exused may much in favor of some of the stocks still left on the list; but as they de not attract much attention from speculators, they are of no consequence. There are plenty of good securities on the market to employ all the capital of operators, and the advantages derived from dealing in first class stocks are so great that it is a matter of actonishment to us how speculators can tench stocks which really have no value. If good stocks depreciate in market value, and holders can carry them, they serve as profitable investments until a more active demand gives them a greater current value.

The following sales of stocks and bonds were made after the adjournment of the board, by A. H. Nicolay:—
\$5,000 Tollede, Norvellt and Cieveland R. The return	s for the s	reck ending	February 16			

The returns for the week ending February 15, compared with those for the week previous, show an increase in the line of discounts of \$531,631; and a decrease in deposite of \$530,024 circulation, \$55,150; specie \$559,601. This is different from what we anticipated. The decrease in specie on hand is the result, probably, of the demand for payments into the Sub-Treasury. The difference in deposits has been caused, doubtien, by increased wants for business purposes, compelling a reduction of accounts. The variations in the issue department are of little consequence. They are limited, the aggregate not having varied a million of dollars within the past eight months. The carnings and expenditures of the Housatonic Rall-

road Company during the past year has bee	m as follo
Passengers	\$108.8
Preight	207,4
Malis	8,6
Total	3324,9
Net	

From this apparent amount of not carnings must be deducted the reuts paid to the Bertzhire and Pittefield and Stockbridge roads, (about \$74,000,) some \$10,000 paid in adjustment of calms against the company for damages in past years, with an equal or larger amount of expenditure occasioned by the freshets in August and November last. Aside from this, the purchase of new engines and ears has been found measurey in order to earry on the business of the road to advantage. Of course there is no "look" for a dividend under such circumstances.

The assumed statement exhibits the rate of dividend declared in each six menths of 1868, by the different

year. Some of the corporations gave very large returns on the capital larested, showing that the present revenue tariff has not proved as rulaous as many anticipated. The system of management pursued by these companies during the past few years, has been ve y different from that heretofdee pursued, and we see the benefits realized in the ratus of dividend declared. We do not hear any complaints now from the East about the injustice of the present tariff, but we have no doubt the manufacturers of that section would be glad to get any modification in their favor. The manufacturing interest generally is in a very prosperous condition, and Congress should be exceedingly cautious about meddling with the tariff of 1846.

exceedingly cautions about meddling with the tariff of 1846.

The opening calebration of the Chicago and Rock Island Railroad took place on Wednesday, the 22d of February, when the connection of the Mississippi line with Lake Mishigan by a continuous line of railroads, was consummated. In February, 1851, the Legislature chartered the company; in October of the same year the contract for its construction and equipment was taken; in April, 1852, the first estimate for work upon it was paid; and in February, 1854—three years from its charter and twenty two months after ground had been broken upon if—the work is completed and cars are running daily its entire length—one hundred and eighty-one miles. In October, 1851, the company closed a highly favorable contract for the construction and equipment of the entire road. By the terms of the contract the road was to be completed, equipped and placed in the hands of the company by the last day of January, 1856, for which the contractors were to receive the sum of \$3.967,638, as follows: \$400,000 Jacash, \$1,487,638 in capital stock, \$2,000,000 in mortgage and convertible bonds bearing seven per cent interest, the contractors paying interest upon such bonds as they might sell, until the delivery of the read to the company. Subsequently, and after a portion of the road had been in operation, it was found that the rolling stock provided for in the contract would not be sufficient to accommend to the summents of the road. Another contract commodate the business of the road. Another contract was therefore entered into with the same firm, to supply the deficiency and also to fence the road, which, together with the right of way, and interest on stock up to the time of completion and delivery of the road, swells its actual cost to about \$4,750,000. It is proper to state that the work between Geneseo and Rock Island has been delayed some two or three weeks, in consequence of the detention of locomotives belonging to the company, at Krie. But for this fact the cars would have reached Rock Island by the first day of the present month.

By the last annual report of William Jervis, Esq., chief engineer of the road, we learn that the following rolling stock will be required to accommodate the freight and passenger busines that will pass over this road:—25 locomotives, 24 first class passenger cars, 10 second class passenger and the stock will be required to accommodate the freight and passenger busines that will pass over this road:—25 locomotives, 24 first class passenger cars, 10 second class pas

passenger busines that will pass over this road:—25 lose motives, 24 first clars passenger care, 10 second class passenger care, 10 second class passenger care, 12 baggage and post office care, 200 covered freight care, 200 platform freight care, 35 hand (repairing) care. The business of the road thus far has largely exceeded the estimates. The following table shows the gross earnings since its opening to Joliet in Outober, 1852, up to February 1, 1854, exclusive of all freight carried for contractors, and material for construction purposes:—

For passengers.

\$365,639 36

For freight.

\$99,849 71

For mails.

The assexed statement exhibits the quantity and value of certain articles exported from this port during the west ending and including Saturday, the 25th of February, 1884, disting uishing the destination and extent of ex LONDON.
